PROFESSIONAL EXPERIENCE

B QARLSON SOFTWARE TECHNOLOGY

Aug 2023 - Dec 2023

FrontEnd Intern

- Implemented strategic optimizations and performance enhancements resulting in a **25% increase** in overall system efficiency, leading to cost savings and improved productivity.
 - Conducted an in-depth analysis of **user experience** intricacies and optimized database interactions, resulting in a **40% reduction in load times**, leading to a better user experience and increased customer satisfaction.
-

Languages : Java, JavaScript, Html, CSS

Frameworks : React, Bootstrap, Tailwind CSS, Node JS & Express JS

Developer Tools : Git & GitHub, VS Code, Netlify & Render, Figma & Postman

Cloud & DevOps Tool Linux & Shell scripting, AWS Cloud, GitHub action CI/CD, Terraform & Docker

PROJECTS

Bllege | Platform for College Students' Anonymous Interaction

[Github](#)

React | Node.js | MongoDB | Tailwind CSS | Socket.io | Express | Axios | Zustand | Formik & Yup

- Built a vibrant, anonymous community that allows students to **share insights**, exchange valuable career advice, and stay updated on college placements and industry trends.
- Engineered anonymous **posting functionality** and college-specific channels, creating a **secure environment** for students to discuss campus issues and career advancement.
- Enabled **real-time communication** with Socket.io, facilitating live interactions and engagement between users, significantly boosting platform activity and user retention.
- Expertly designed **UI/UX** with a focus on **usability, scalability, and security** and **open communication platform** for college students to connect and collaborate.
- Optimized performance, reducing **loading time by 50%** and increased platform engagement.

Job-Seeker

[Github](#)

React | Tailwind CSS | React-router-dom | Jest- dom | React icon | Bootstrap | EC2 | S3

- Job portal with a user-focused application, utilizing advanced frontend technologies and **precise UI** design to create a seamless, feature-rich user experience.
- Prioritizing intuitive design and optimal functionality. **Deployed** the project on **AWS Amplify** using **GitHub Actions** for seamless integration and automated deployment workflows.

Big Boon | Architected a scalable eCommerce solution

[Github](#)

React | Nodejs | Material Ui | React-router | Styled Component | Express | MongoDB | Stripe

- Enabling smooth handling of increasing user traffic and future growth.
- Prioritized security by implementing robust measures and integrating seamless payment gateways for **secure transactions** and **user data protection**.
- Streamlined the development process with a **CI/CD pipeline** using **GitHub Actions**, ensuring efficient deployment and a greener development environment through **Dockerization**.

RJDTC | Website Developed for a Client

[Github](#)

React | Nodejs | MongoDB | Tailwind CSS | React - router

- Designed a feature-rich website **as a freelancer**, including an appointment section with a visually appealing and responsive UI. Reduced loading **time by 50%**.
 - Enhanced proficiency in **UI/UX design** and frontend development through this project.
 - Demonstrated expertise in building user-focused web and **mobile applications**, focus on efficient design.
-

EDUCATION

NPSEI , Pithoragarh (Uttarakhand Technical University)

Aug 2022 - Present

Bachelor of Technology in Computer Science & Engineering

7 CGPA

Government Polytechnic Narendra Nagar , T.G.

June 2022

Diploma in Electrical Engineering

80.23 %
